

Ali Husnain

I'm a Full Stack developer with knowledge and experience in JavaScript, Node.js and React with a degree in Computer Science. I am looking for a new role in web development and the IT Sector which will develop and foster growth within my chosen career. I have over one-years' experience in IT implementation and working with external clients.

EXPERIENCE

NorthCoders, Manchester — Student

AUG 20 - DEC 20

Full stack development course working solo, in pairs and a team and completed projects in JavaScript, Node, React etc (detailed some below), and TDD(test driven development) and Git version control.

Project: Student News portfolio

Student news blog in which I coded the backend and frontend.

- Backend was built with Restful API using Node.js express, PostgreSQL, Knex and use Jest for testing

<https://github.com/alihusnain4190/be-nc-news>

- Frontend was built with React, HTML, CSS

https://github.com/alihusnain4190/nc_news

- Hosted: <https://nc-student-news.netlify.app/>

Final Project : Charity-Bay

Charity-bay is a social website, I enjoyed creating this web app with my team, we developed this in a challenging time frame. I contributed to both the backend and frontend linked below.

- Backend was built using RESTful API using Node.js, Express, PostgreSQL, Knex, AWS S3 bucket to store images and use Jest for testing

<https://github.com/alihusnain4190/be-charity-bay>

- Frontend was built with React, HTML, CSS, Material-UI and firebase for user authentication

<https://github.com/alihusnain4190/fe-charity-bay>

- Heroku: <https://charity-bay-be.herokuapp.com/api>

- Hosted: <https://charity-bay.netlify.app/>

Music Magpie, Stockport — Warehouse Operator

SEP 2019 - FEB 2020

- Ensured Customer satisfaction and helped deal with queries
- Met challenging target and KPI's
- Teamwork - to manage workload and resources

HARD SKILLS

JavaScript, Jest, Node, Express, JSON, Github, PostgreSQL, Knex, React, HTML, CSS, Sass, JAVA, Visual Studio Code, Figma, Agile Methodologies, Netlify

SOFT SKILLS

Problem-solving – Creating my projects I used various materials, blogs, videos and used my network

Teamwork – at Northcoders worked with different students in pairs and teams daily to complete task

Problem Solving Skill

Time management – Use wireframe for my project so I can break down into simpler tasks

SELF LEARNING

I learnt and built my knowledge of JavaScript Fundamentals, HTML, CSS and I am using Code Wars and FreeCodeCamp to practice katas. Link <https://www.codewars.com/users/AliHusnain>

Taj Grocer, Crawley — Customer Assistance

MAY 2018 - JUL 2019

- Ensured Customer satisfaction and helped deal with queries
- Served and assisted customers
- Teamwork – to manage workload and resources

Shaukat Khanum Memorial Cancer Hospital, Pakistan — Software implementation Engineer

FEB 2017 - DEC 2017

- Understanding clients' needs and clearly communicating the themes to the team.
- Software implementation and testing of output for users' needs
- Training clients in the Hospital Software system
- Problem solving for external clients to adapt the system to the client's needs
- We used Oracle for database and Java Language

TechVing, Pakistan —Game developer (Internship)

AUG 2016 - DEC 2016

- Application Development through the product life cycle (designing, coding, testing and delivering product to customer)

Fire Fighter Truck Rescue Simulator:

I created the Fire Fighter Truck game using Unity 3D software with C# language. The aim was to extinguish fire using the fire truck. This had 10 levels and you had to progress through the game.
